 jagtial, Telangana

Professional Summary

B.Tech graduate in Computer Science (Data Science) with a strong foundation in full-stack Python development and data analytics. Experienced in building end-to-end web applications using Flask and designing interactive, data-driven business intelligence dashboards. Proven ability to bridge engineering concepts with data-backed insights to solve real-world problems.

EDUCATION

B-Tech, Computer Science Engineering in Data Science(7.14 CGPA) <i>Malla Reddy College of Engineering and Technology</i>	2023 – 2026 Hyderabad
Diploma in Mechanical Engineering (6.12 CGPA) <i>Jyothismathi Institute of Technology and Science</i>	2020 – 2023 Karimnagar
Secondary School of Certificate (10.0 CGPA) <i>Paramita Heritage School (IIT)</i>	2019 – 2020 Karimnagar

TECHNICAL SKILLS

Programming Languages

Python, SQL, JavaScript

Web Development

HTML, CSS, Flask

Databases

SQLite, MySQL

Data Analytics & BI

Power BI, Tableau, Excel

Tools

Git, GitHub, VS Code

Professional Experience

PHP & Full-Stack Web Development Intern <i>Virtual Internship Apex Planet</i>	08/2025 – 09/2025
- Developed dynamic web applications using PHP, MySQL, HTML, CSS, and JavaScript. - Implemented CRUD operations, user authentication, and form validations. - Developed and integrated secure server-side logic and RESTful API endpoints utilizing PHP and MySQL to handle dynamic user data seamlessly.	

COURSE

NxtWave - CCBP 4.0 Full-Stack Development Program <i>Nxtwave Disruptive Technologies</i>	02/2023 – Present
- Hands-on training in Python, SQL, HTML, CSS, JavaScript, and web application development - Built and deployed multiple projects while following clean coding and best practices	

PROJECTS

Job Portal Web Application

03/2026

Python, Flask, SQLite, HTML, CSS, JavaScript

- Developed a web based job portal enabling user registration, authentication, job search, and application management.
- Designed and integrated SQLite database for user and job data storage.
- Implemented CRUD operations and session based authentication.
- Engineered a normalized SQLite schema to manage user credentials and job posts, reducing query latency through efficient indexing.

The Heart Disease Prediction Web App

10/2025

Python, Logistic Regression, Flask, Streamlit

- Engineered an end to end machine learning application utilizing Python and Logistic Regression to estimate cardiovascular disease risk based on clinical patient metrics.
- Deployed the predictive model via a Flask and Streamlit backend, designing an intuitive user interface for real time data input and actionable health risk analysis.

HR Attrition Analytics Dashboard

02/2025

Tableau

- Built an interactive dashboard to analyze employee attrition trends.
- Visualized attrition by department, age group, education level, and job role.
- Generated insights to support workforce retention decisions.

Student & Teacher Performance Dashboard

08/2024

Power BI, SQL, Excel

- Processed academic performance data and built an interactive Power BI dashboard.
- Designed KPIs and visualizations to track student performance and teacher effectiveness.
- Enabled quick identification of performance trends using drill down analytics.

Hackathons

OpenAI x NxtWave Buildathon

01/2026

(ID: 81ce955f-6154-4b65-ae2d-d4fb7e7467d5)

Developed innovative AI-integrated workflows under tight deadlines, leveraging advanced prompt engineering to build scalable solutions for real-world market challenges.

CERTIFICATIONS

Deloitte - Data Analytics job simulation.

Google - Data Analytics Certification.

OfficeMaster - Power BI Workshop.

Apex Planet - PHP & Fullstack web development.

NPTEL - Python certification.
