SUMMARY

B.Tech graduate in Computer Science (Data Science) with expertise in Python, SQL, Power BI, Tableau, and Web Technologies. Developed end-to-end analytics dashboards and web applications across academic projects, applying data-driven solutions to business and engineering challenges.

WORK EXPERIENCE

- PHP & Full-Stack Web Development Intern, Apex Planet** 08/2025 – 09/2025
- In 2025, developed dynamic PHP web applications using PHP, MySQL, HTML, CSS, and JavaScript by implementing reusable components and modular code.
 - Implemented CRUD operations, user authentication, and form validation to ensure reliable data handling throughout the application.
 - Within 2 months, developed and integrated secure server-side logic and RESTful API endpoints using PHP and MySQL for dynamic web applications.

SKILLS

Programming C++, Python, SQL	Data Engineering Data Modeling, Data Pipelines, Data Warehousing, ETL	Web Development CSS, HTML, REST APIs	Data Analytics & BI Data Visualization, Excel, Power BI, Tableau
Databases MySQL, PostgreSQL	Tools GitHub, VS Code		

PROJECTS

- AI-Powered Job Portal, Python, SQLite, AI Integration** 02/2026
- Developed a Python-based web application to streamline candidate registration, job posting, and application management workflows.
 - Engineered an AI-powered recommendation algorithm to analyze candidate profiles and job descriptions, significantly improving match accuracy.
 - Architected a normalized SQLite database with strategic indexing, reducing query latency and accelerating job search retrieval by 20%.
 - Implemented secure, session-based authentication to protect sensitive applicant data and reliably manage user account access.
- Retail Sales Data Warehouse & BI Pipeline, Python, PySpark, PostgreSQL, Tableau** 04/2025
- Engineered a distributed PySpark ELT pipeline to ingest and process 1,000,000+ retail transactions, enabling scalable and efficient data throughput.
 - Architected a Kimball Star Schema in PostgreSQL, transforming flat staging data into optimized Fact and Dimension tables for analytical reporting.
 - Resolved data anomalies using advanced SQL window functions to deduplicate records, guaranteeing 100% database referential integrity.
 - Automated Python (psycopg2) data extractions to feed interactive Tableau dashboards, visualizing YoY revenue and geographic sales trends.
- Student & Teacher Performance Dashboard, Power BI, SQL, Excel** 08/2024
- Developed a Power BI dashboard to analyze student performance and teacher effectiveness using SQL and Excel datasets.
 - Cleaned, transformed, and integrated academic data to improve reporting accuracy.
 - Designed KPIs, drill-down reports, and interactive visualizations for performance monitoring.
 - Reduced manual reporting effort by 50%, enabling quicker identification of academic performance trends.

CERTIFICATIONS

Data Analytics Certification  — Google | **PHP & Fullstack web development**  — Apex Planet | **Data Analytics job simulation**  — Deloitte | **Python certification**  — NPTEL | **Power BI Workshop**  — OfficeMaster

EDUCATION

B-Tech, Computer Science Engineering in Data Science 08/2023 – 05/2026
Malla Reddy College of Engineering and Technology
GPA: 7.14 CGPA
